

X90 Heavy Duty Static Grounding Clamp

Conductive (Metal) plant items and equipment run the risk of accumulating dangerous levels of static charge if they are not properly grounded. Using purpose designed, certified static grounding clamps is one of the safest and most cost effective methods of ensuring plant, equipment and people are protected from static ignitions in potentially flammable or explosive atmospheres.

- **Robust Construction**
Ensures stable and continuous contact with equipment at risk of static charging and accumulation.
- **Tungsten Carbide Tips**
Penetrating & hard wearing enabling low resistance electrical connection for safe dissipation of static.
- **Stainless Steel**
Corrosion resistant construction extends useful operational life in tough industrial environments.

Best practise standards

(GENELEC CL/TR: 50404 & NFPA77) recommend the use of purpose designed static earthing clamps for **safely dissipating static electricity** in potentially flammable or explosive atmospheres

X90 Static Grounding Clamp

The robust construction of the **X90** is the perfect solution for earthing and bonding in Heavy Duty Industrial Environments.

Hard wearing **Tungsten Carbide Tips** penetrate hardened layers of coatings, dirt and rust which can **Inhibit Safe Static Dissipation**

The **X90** can be purchased on 20ft (6m), 30ft (9m) and 50ft (15m) **Retractable Cable Reels**

The **X90** can be purchased with 10ft (3m), 16ft (5m) or 32ft (10m) of **Cen-Stat GREEN or ORANGE Retractable Spiral Cable**

The **X90** can safely dissipate static from a broad range of plant equipment including:

- Large Containers and Drums
- Tanks
- IBCs
- Mobile Tankers
- Railcar Wagons

The X90 clamp forms part of the Cen-Stat range of Static Grounding and Bonding Equipment available from Newson Gale

Leading the way in hazardous area static control
